REPOSITORY INTELLIGENCE

GitHub Repository Analysis Report

Python

Default branch: master

Generated: 01 October 2026, 10:21 AM

BRANCHES	COMMITS	CONTRIBUTORS	HEALTH SCORE
1	170	28	60/100

This report summarizes repository metadata, detected technologies, project organization, activity signals, and AI-generated insights.

1. Repository Overview

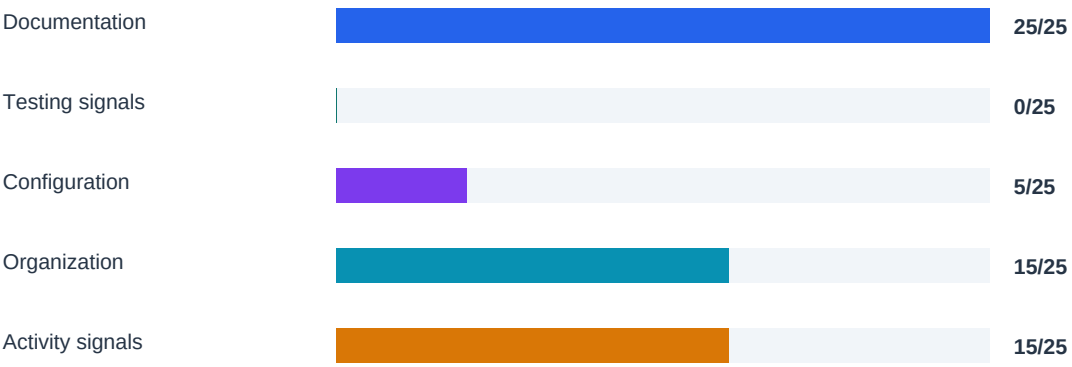
Metric	Value
Repository	Python
Default branch	master
Branches	1
Commits	170
Contributors	28
Total files	105
Directories	16

2. Repository Health

60 / 100

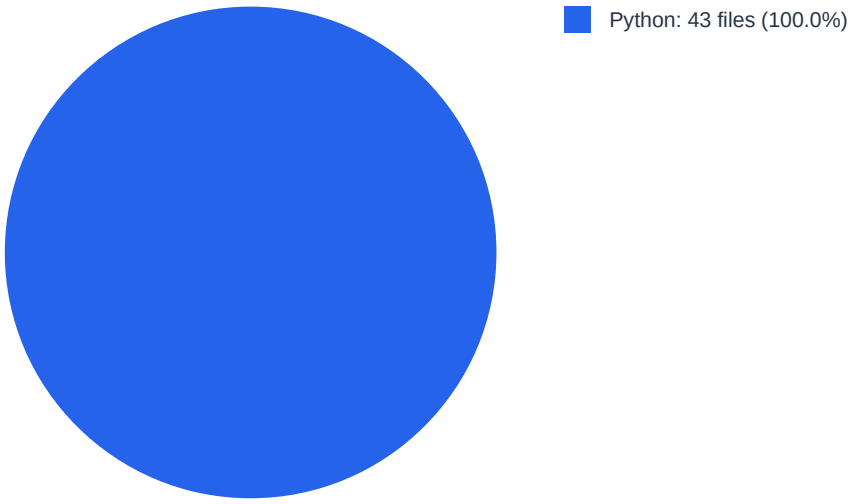
Some measured signals are present; review the breakdown.

Health category points (out of each category maximum)



Interpretation: this score is a heuristic based on available repository signals. Detected test files do not prove tests pass, and commit or contributor counts do not establish code quality. It is not a security audit.

3. Programming Languages



Language	Files	Share
Python	43	100.0%

4. Dependencies

No dependencies were detected.

5. Documentation

• Contributing.txt

• Datasets.txt

• exception_data.txt

• Numpy\data.txt

• Numpy\Numpy commands.txt

• Pandas\Fremont_weather.txt

• Pandas\outjson.txt

• Python in 90 minutes\city_data.txt

• README.md

• Strings\bands.txt

6. Configuration Files

• .gitignore

7. Repository Structure

Top-level folders

• Date Time Timestamp

• Intro to Python Data Structures

- Iris Dataset
- Lambda Functions
- LinkedLists
- Matplotlib
- NLTK
- Numpy
- Object Oriented Programming
- Pandas
- Python in 90 minutes
- Sorting Algorithms
- Strings
- Tensorflow_Keras
- Trees
- Web Data Mining

Top-level files

- .gitattributes
- .gitignore
- addition of two number
- bfs.py
- BinaryToDecimal.py
- Contributing.txt
- Datasets.txt
- deep_copy.ipynb
- DepthFirstSearch.py
- dict_comprehensions.py
- exception-handling.py
- exception_data.txt
- factorial.py
- file_ops.py
- flatten_list.py
- gcf.py
- graph_adjacency-list.py
- graph_adjacency-matrix.py
- Happy Pi Day.ipynb
- HashMap.py
- HexToDec.py
- lcm.py
- LICENSE

- list_comprehensions.py
- match statements.ipynb
- MaxHeap.py
- Primes.py
- Python Bisect.ipynb
- Python Generators.ipynb
- Python List Iteration.ipynb
- python oriented programming
- Python Random Numbers Module.ipynb
- Python Set Comprehensions.ipynb
- Queues implementaion.py
- README.md
- remove_from_list.py
- Stacks, Queues & Heaps.ipynb
- String Formatting.ipynb
- TempConversion.py
- turtle_graphics.py
- Unpacking Variables.ipynb

8. Hotspot Files

File	Changes / commits
README.md	16
BinarySearchTree.py	4
LinkedLists.py	4
SortingAlgorithms.py	4
2-3_tree.py	3
graph_adjacency-list.py	3
HashMap.py	3
match statements.ipynb	3
Mergesort.py	3
Primes.py	3

9. AI Summary

Repository purpose

AI Summary unavailable: Gemini API request failed: 429 RESOURCE_EXHAUSTED. {'error': {'code': 429, 'message': 'You exceeded your current quota, please check your plan and billing details. For more information on this error, head to: https://ai.google.dev/gemini-api/docs/rate-limits. To monitor your current usage, head to: https://ai.dev/rate-limit. \n* Quota exceeded for metric: generativelanguage.googleapis.com/generate_content_free_tier_requests, limit: 20, model: gemini-3.8-flash\nPlease retry in 8.69316726s.', 'status': 'RESOURCE_EXHAUSTED', 'details': [{'@type': 'type.googleapis.com/google.rpc.Help', 'links': [{'description': 'Learn more about Gemini API quotas', 'url': 'https://ai.google.dev/gemini-api/docs/rate-limits'}]}, {'@type': 'type.googleapis.com/google.rpc.QuotaFailure', 'violations': [{'quotaMetric': 'generativelanguage.googleapis.com/generate_content_free_tier_requests', 'quotaId': 'GenerateRequestsPerDayPerProjectPerModel-FreeTier', 'quotaDimensions': {'location': 'global', 'model': 'gemini-3.8-flash'}, 'quotaValue': '20'}]}, {'@type': 'type.googleapis.com/google.rpc.RetryInfo', 'retryDelay': '8s'}]}}

Technologies used

No information available.

Project organization

Unavailable.

Intended users

Unavailable.

Beginner summary

AI service could not provide a summary.

10. AI Recommendations

Repository strengths

No information available.

Areas for improvement

No information available.

Best practices

No information available.

Overall quality

Unavailable

11. README Excerpt

#This is a open source project.
Python 3
These files are mainly intended to accompany my series of YouTube tutorial videos here,
https://www.youtube.com/user/joejamesusa
and are mainly intended for educational purposes.
You are invited to subscribe to my video channel-Joe James, and to download and use any code in
this Python repository, according to the MIT License.
Feel free to post any comments on my YouTube channel.
I am very happy to see you there on my you tube channel. excited!!!!!!!!!
Subscribe to my channel for more tutorial videos.

This source code is easy to understand and reliable for self study and you will learn them easily, try to practice more coding by making algorithms yourself and you can become a better Python programmer, and remember "Try to learn something about everything and everything about something".

Thank you for reviewing my repositories and keep practicing.
Joe James.

Happy coding guys!■

Report note: Findings depend on the repository metadata available at analysis time. AI-generated summaries and recommendations may require human review. The health score is an indicative heuristic, not a certification, security assessment, or substitute for code review and testing.
